**RE: ROHS Certificate of Compliance**

Dear Customer:

This letter serves as a guarantee and certification that all Fenner Precision products are compliant with the Restriction of Hazardous Substances (RoHS) regulations.

Fenner is pleased to manufacture products that are in compliance with United States and international regulations. Specifically, Fenner's products are compliant with the RoHS regulations, Directive 2002/95/EC.

Fenner's raw material list, formulations, and supplier list are confidential. To ensure compliance with customer requirements, Fenner works closely with its suppliers to meet customer demands. The elemental metals of concern, Cadmium, Lead, Mercury, and Chromium, are not contained in the raw materials nor are they added to Fenner products. In addition, Fenner does not add flame retardants – PBB and PBBE to its products nor are these materials in the raw materials that are used to manufacture its products.

In closing, Fenner understands the importance of the RoHS regulations and is pleased to offer materials that are compliant. Fenner will continue to support its customers. Thank you very much for your continued business.

Sincerely,

Nancy Green-Rowe  
Manager Environmental, Health and Safety
